

The Five Card Hand Bonus with the G3™ progressive system gives your favourite poker-derivative games a whole new dimension. Players now have more ways to win the Progressive Jackpots, Fixed Payouts and Mystery Prizes.

Getting Started

The Five Card Hand Bonus is a side wager added to regular poker games. The basics of the game do not change as the underlying games are played following their usual respective rules. However, the Players now have the option to participate in an exciting Five Card hand side wager based on the outcome of their own hand, or even the Dealer's hand! Even if you lose to the Dealer in the underlying game, you still have the chance to win a prize with the bonus!

How to Play

In each of the mentioned poker derivative games, the Player's & Dealer's Five Card hand are created as follows:

Three Card Poker:

Player's or Dealer's five card hand consists of their respective three personal cards and two community cards.

Caribbean Stud Poker:

Player's or Dealer's five card hand is entirely based on the poker value of their respective five card hand.

Mississippi Stud:

Player's five card hand consists of their respective two hole cards and the three community cards. When Players choose to fold their hand on the underlying base game while participating on the side wager, their final five card hand is still considered for purposes of the side bet.

Let It Ride:

Player's five card hand consists of their respective three hole cards and the two community cards.

Side Betting

The Progressive side bet gives you more chances to win with an additional payout card and an incrementing jackpot. The top payout – 100% of the meter – is for a Royal Flush. See payable for full listing of payouts. Bonus hands always pay, even if you lose to the Dealer, so be sure to notify the Dealer if you have a winning side bet hand.

The G3™ optional side betting system replaces the old coin slot and coin spot technologies and gives Players more chances to win than ever before!

Getting Started

Purchase credits from the Dealer (\$1 per credit). The Dealer will enter the amount into your credit bankroll. Using the two betting buttons (Player Hand and Dealer Hand), place any side bet on the Player's (you) and/or the Dealer's hand. You may wager from 1 credit up to 5 credits on each.

What Can I Win?

PROGRESSIVE PRIZES: If you have a Royal Flush or Straight Flush – you win all or part of the progressive meter! See BONUS PAYOUT SCHEDULE below. If the Dealer has a Royal Flush or Straight Flush and you have side bet 1 to 5 credits on the Dealer's hand, you win your portion of the payout!

FIXED PAYOUT: If you have a Fixed Payout winning hand, the prize is multiplied by the number of credits you have side bet on the Player's hand. If you have side bet on the Dealer's hand and Dealer has a Fixed Payout winning hand, you will win the prize multiplied by the number of credits you wagered. See BONUS PAYOUT SCHEDULE below. Your winnings will be automatically added to your bankroll.

MYSTERY PRIZES: Mystery Prizes such as the Magic Card™, Lucky Player® and Lucky Dealer® are awarded randomly and can be won by any player participating in the side bet. Mystery Prizes are multiplied by the number of credits you have side bet on Player and/or Dealer. See BONUS PAYOUT SCHEDULE below. Your winnings will automatically be added to your bankroll.
